

Spring balancer 600 series

Spring balancers and balancers make the suspended load almost weightless. Work equipment and tools attached to spring balancers are quicker to pick up and to „put back down“. The suspended load remains virtually suspended when released.

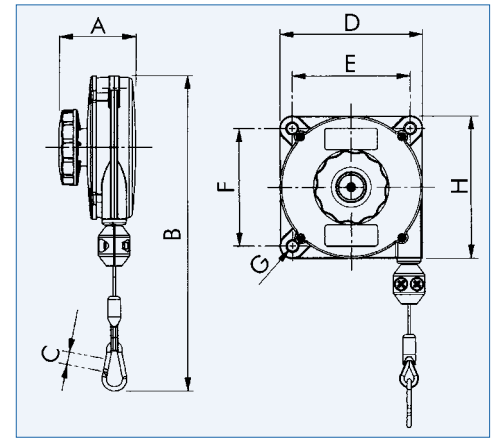

This greatly improves productivity and workplace tidiness.

- Robust aluminium pressure die-cast housing
- Durable steel wire cable
- Precise cable guidance
- Various cable lengths
- With rope stopper and mounting snap hook

Digital crane scale MCW

Digital, reliable and easy-to-use crane scales for industrial use, with standard storage or transport case. Due to the small amount of space it takes up, the MCWN series of crane scales enable lifting equipment to be used effectively. The MCWN series of crane scales come with a wireless module, a USB port for PC connection, a printer connection and a weight display as standard. A test certification performed with test weights is provided with each set of crane scales.

Features:

- Weighing range from 300 kg to 25.000 kg
- Large 25 mm LCD display, backlit
- Precision: $\pm 0.03\%$ of the weighing range (from limit value)
- Humidity-resistant keyboard with 5 keys: ZERO SETTING, TARE DEDUCT. (autom. or manual), MODE, PRINT and ON/OFF
- Robust, stove-enamelled steel housing
- Standard remote control covering distances of up to 8 metres. Can be configured by customer as tare deduction or as 4-key remote keyboard.
- Power supply from 4 batteries (type AA), operation approx. 40 hours (without wireless transmission).
- Digital setup and calibration, can be programmed directly with sample weight via keyboard or PC (with tools).
