

Hose reel series L-272 and L-275

The PLANETA hose reels in the 272 and 275 series with a sealed housing made of strong, impact-resistant plastic, are suitable for working with water and compressed air. The 272 series has a manual non-return fixture that prevents accidental release of the brake when tensile loads are applied. The encapsulated, lifetime-lubricated drive spring guarantees a long service life in continuous use. The drum is equipped as standard with a hybrid hose suitable for temperatures up to 60°C.

TYPE	Fitting	Nominal size of hose	Length	Max. pressure hybrid hose	Medium	Weight approx. kg	Order No.
	inch	DN	m	bar			
L-272-082	1/4"	6	8	12	Water & Air	3	G40095
L-275-152	1/4"	6	15	20	Water & Air	5	G40092
